My dear friends and colleagues,

it is a great pleasure to invite you to the 6th Edition of the Technology and Training (T&T) in Endourology Course, which will be held in Torino (Italy) at the Cottolengo Hospital from September 22nd to September 23rd 2016, preceded by the EULIS Workshop on Stone Treatment, from September 20th to September 21st 2016. This year, the union of these two events will provide a unique opportunity for all endourologists from an educational point of view.

The first EULIS part will deal with urolithiasis miniinvasive and UTUC endoscopic treatments, offering Live Surgeries, round tables and face-to-face discussions, demonstrating cutting-edge technologies, presenting innovations in surgical techniques and critically discussing the current gold-standard approaches.

The second T&T part will deal with BPH miniinvasive and bladder cancer endoscopic treatments, respecting the same structure (Live Surgeries, round tables and face-to-face discussions).

The great innovation of this year is the additional introduction of continuous Hand-On-Training sessions with training models and dedicated tutors, both for stone and BPH endoscopic techniques.

As every year your valuable clinical and scientific contribution will be essential for the success of the meeting, and for this reason I will be really very grateful to you if you will come, for the gift of your time, commitment and dedication. The most eminent experts in the field will also enrich the events with their participation, and the result is expected to be outstanding and stimulating as it also happened during the five past editions.

We wait for you all in Torino! Have a look on YouTube at the promotional video of the event and join us!

All our best

Cesare Marco Scoffone (Chairman), with Cecilia Maria Cracco and Roberto Tarabuzzi (Scientific Committee)
